

**BE
SURE.**

F-SECURE[®]

Yes, you can be sure

Securing computers, networks and mobiles against the increasing complexity of viruses, worms, hackers and other threats calls for commitment, vigilance and intelligence. And above all, uncompromising reliability.

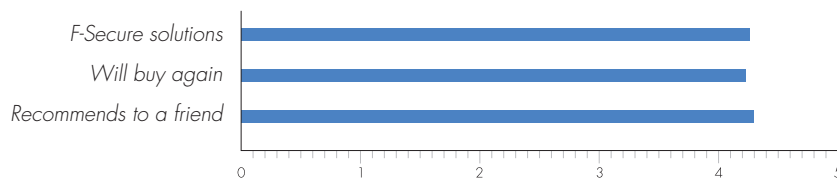

At F-Secure we are driven by a single aim: to enable corporates and individuals alike to enjoy the highest levels of

permanent IT security. Delivered with outstanding ease of use and dependable support they can trust.

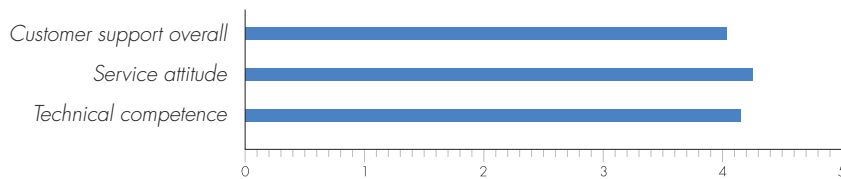

That is why, in every recent quarter, we have been growing faster than all our publicly-listed competitors.

For us it's personal

The way we see it, reliable security solutions are only as good as the quality of research and personal dedication that lie behind them.

Whether for home computers or complex corporate networks – it is not just about technology tools. It's about people and delivery. This is what we mean by "security as a service". Delivered, in collaboration with our trusted partners, with a passion that puts your protection first, always.

Our designers are inspired to make advanced technology so easy to use and manage that protection is almost invisible. We also bring sales, service and support close to where you are – thanks to our partner network of value-added resellers, Internet and IT service providers, mobile operators and retailers.

Use of the Internet is constantly evolving, as are the nature and quantity of potential threats. New vulnerabilities appear with each release or upgrade of an application or operating system.

By providing security as a service – our unique approach, detailed on page 06 – we give our customers the strongest available protection and the confidence to focus on their ongoing commercial priorities.

Why speed matters

In this business, speed of response is an essential factor in the quality of protection. Minutes can count, literally – often making the difference between whether your systems survive an attack or not.

F-Secure has a proven track record of reacting faster to imminent threats and staying one step ahead of the industry in developing protection against new ones. Our proactive technologies together with record reaction times minimize false positives and repeatedly save our customers from attacks that wreak havoc worldwide. What's more, as risk scenarios mutate, our automatic security updates ensure that the best available protection is always at your disposal.

As we say, reaction speed matters. Criminals commonly test the malware they develop against commercial heuristic ("proactive") packages.

We never sleep

The F-Secure Data Security Lab, staffed with globally recognized virus experts, is on call 24 hours a day. Responding to new and emerging threats. Developing and distributing

See our real-time virus world map: <http://worldmap.fsecure.com/>

Did you know that:

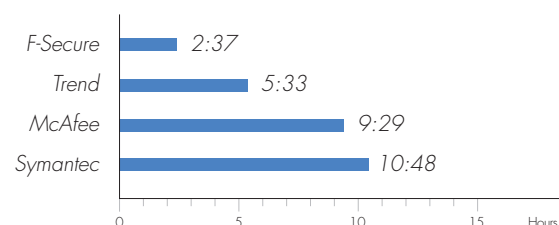

- > If a virus protection update is delivered to you only three hours faster, it can reduce the probability of infection by whole orders of magnitude.
- > By contrast, receiving an update just 60 seconds too late can mean that your whole antivirus system is completely disabled.

That's why our renowned ability to pounce on diverse, unpredictable new threats as they appear makes F-Secure your most reliable choice.

To find out more about the critical importance of fast response times, visit: www.fsecure.com/speed/

easy-to-use protection against new viruses within hours of their discovery – and often well in advance of other antivirus vendors.

Average response times for 12 major outbreaks in the first half of 2005

Data security for homes and businesses

F-Secure is a leading security solution provider for complex networks and mobile workforces. Today, however, these issues have become a daily concern for companies of all sizes – not to mention individual personal computer and mobile phone users. Whatever the type or size of the security challenge, we have solutions that can be relied on to protect your vital interests.

Centrally-managed security for large enterprises

F-Secure products enable CIO's and IT managers to enforce corporate security policies, limit legal liability, increase employee productivity and reduce network bandwidth consumption. Now that mobile e-mail and remote data access have become increasingly routine, we can also help corporate customers of every size to safeguard their out-of-office communications. Reference customers include Barclays Bank, TeliaSonera, Crédit Agricole, DaimlerChrysler, Honda, BASF, the Finnish Parliament and the Tokyo Metropolitan Government.

Integrated solution packages for small and medium-size businesses

With F-Secure's resources and service at their disposal, businesses with limited IT staff resources can enjoy the same benefits as larger enterprises. Solutions that are easy to use and manage ensure the highest level of protection. Using our integrated solution packages, a comprehensive, layered defence system can be created to protect your entire IT system – from gateways and servers to desktops and laptops, all the way to mobile phones.

Full-featured protection for homes and small offices

F-Secure provides maintenance-free, easy-to-use protection against viruses and hackers for personal computer users, and even for mobile phones. Once installed, our software is automatically updated and runs in the background, so that security is maintained without any user intervention. You can obtain our products online, at your local retailer or as an option from your Internet service provider.

Mixed environments with Windows, Linux and mobile

To ensure comprehensive protection throughout the infrastructure, we specialize in protecting mixed environments, with powerful solutions for both Linux and Windows platforms, as well as the most popular mobile platforms.

Rootkit protection

Continuing a rich heritage of industry firsts, F-Secure was in 2005 the first antivirus company to include rootkit protection in its Internet security products.

Reliable protection that you can trust

Security as a service – while you mind your own business

Data security is no longer merely a question of technology. Supporting business while ensuring powerful protection calls for a service-centric approach. Rather than expecting you to maintain the expertise and technology needed to stay protected, we deliver security as a service, thus minimizing the distractions to the business you run.

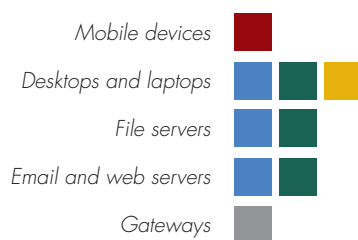

Our full commitment to this approach makes us unique.

F-Secure security as a service is available to corporate customers and home-based consumers, direct or via ISPs and corporate service partners – offering multiple layers of defence and protection for computers and networks running Windows or Linux.

A platform for service partners

F-Secure® Service Platform™ for Gateways

The solution designed for ASPs, network service providers, ISPs and others interested in offering content security using F-Secure gateway technologies to their customer base, either as a value-added service or bundled with existing services.

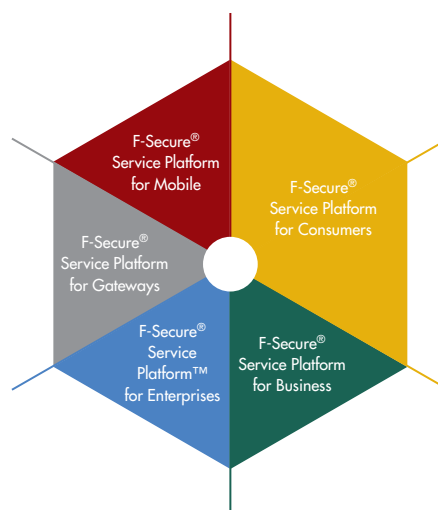

F-Secure® Service Platform™ for Enterprises

The F-Secure Service Platform for Enterprises is a complete solution for security and managed service providers to enable flexible and cost efficient delivery of security services to a wide range of companies. The solution is a combination of pricing model and the full range of corporate content security technologies, complemented by exclusive F-Secure services for service providers.

F-Secure® Service Platform™ for Mobile

With F-Secure Service Platform for Mobile, managed service providers can extend their service offering into a new, growing market. F-Secure award-winning mobile security solutions enable service providers to differentiate themselves by expanding their offering beyond traditional IT security.

F-Secure® Service Platform™ for Businesses

Offers a powerful security service delivery platform that is ideally suited to the needs of service partners serving the SMB segment. F-Secure Service Platform for Businesses is a dynamic solution that offers widely distributed, flexibly deployable and manageable security solutions for small and medium-sized businesses.

F-Secure® Service Platform™ for Consumers – Custom

Enables medium to large-sized service providers to offer automated security services in combination with their existing service portfolio. The service can be marketed under the service provider's own brand, with built-in customization and branding support.

F-Secure® Service Platform™ for Consumers – Standard

A solution tailor-made to the specific needs of the small and medium-sized service provider, enabling them to deploy a low-cost solution that swiftly protects users against Internet threats.

Products to ensure your business continuity

F-Secure® Anti-Virus Client Security™

Provides centrally-managed threat protection by integrating antivirus, firewall, intrusion prevention and antispyware for corporate desktop and laptop computers.

F-Secure® Suites

F-Secure® Anti-Virus™ Small Business Suite is designed for small and medium-sized businesses and includes the key components needed to protect a company's desktops and laptops as well as file and e-mail servers. F-Secure® Anti-Virus™ Corporate Suite combines all the critical components required for corporate virus protection, providing security for laptops, desktops, file servers, e-mail servers and gateways. F-Secure® Anti-Virus™ Enterprise Suite offers everything needed for larger businesses and corporations to protect desktops, laptops, servers and gateways from viruses, Trojans, spam, worms, spyware and network intrusions. The product also includes spam prevention and comprehensive Linux protection.

F-Secure® Messaging Security Gateway™

The product delivers the industry's most complete and effective security for e-mail. It combines a robust, enterprise-class messaging platform with perimeter security, antispam, anti-virus, secure messaging and outbound content security capabilities in an easy-to-deploy, hardened appliance.

F-Secure Linux Solutions

F-Secure® Anti-Virus™ Linux Client and Server Security is an out-of-the-box security solution, providing real-time antivirus

protection, host intrusion prevention and rootkit detection. F-Secure also provides high-performance antivirus and content filtering at e-mail servers and Internet gateways.

F-Secure® Policy Manager™

With this security management system, an IT administrator can install, configure, update, upgrade and monitor all corporate antivirus and security solutions from a single location.

F-Secure® Mobile Anti-Virus for Businesses™

F-Secure Mobile Anti-Virus for Businesses provides automated protection for company smartphones against mobile viruses. For the company IT administrator, F-Secure Mobile Services™ portal offers centralized monitoring of company smartphone protection status.

F-Secure® Network Control™

The solution is designed for operators and service providers to detect rogue PCs and isolate them from the general network until they are cleaned. The users of those PCs are automatically directed to web pages from which they can download cleaning tools and subscribe to our security solution. Once the PCs are clean, access to the Internet is automatically reopened to them.

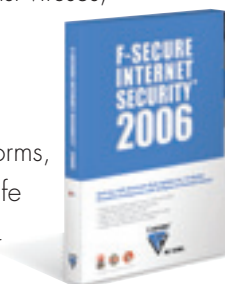

Products for your home

F-Secure Anti-Virus™ 2006

Protects the home computer user against viruses, worms and spyware.

F-Secure Internet Security™ 2006

Provides protection against viruses, worms, spyware and hackers, enabling the safe use of e-mail and Internet applications. Includes unique anti-rootkit protection.

F-Secure Mobile Anti-Virus™

F-Secure Mobile Anti-Virus protects mobile phones against mobile malware such as viruses. Real-time on-device protection and automatic over-the-air antivirus updates ensure that phones remain secure at all times. For selected mobile phones we also offer integrated antivirus and firewall.

Join our ecosystem

IT threats and attacks know no borders, and neither do we. After all, the value of advanced technology is lost if you cannot obtain it conveniently and count on local support. F-Secure protection is available worldwide through our extensive partner network. And as our solutions improve, the business opportunities for our partners continue to expand.

Service Partners

F-Secure's industry-leading security platforms for ISPs and corporate service partners include co-branding, flexible pricing models and easy integration with existing customer support and billing systems. Corporate service partners include Fujitsu Services, WM-Data and others.

Furthermore, we host download and update servers remotely, thus completely eliminating hardware costs. Our long reference list of successful implementations includes TeliaSonera, Wanadoo (France Telecom), Shaw Communications, Charter Communications, PCCW, Telenet and Cablecom. The same benefits are also available to mobile operators.

Value-Added Resellers

F-Secure VARs range from network installers and system integrators to security specialists. We provide a wide range of training programs to ensure that sales and technical teams meet our Certified Partner accreditation promptly, while incentives and lead-generation programs help VARs to accelerate and maintain growth.

Retailers

Consumer sales growth is now one of our principal strategic goals, making close partnerships with retail partners a top priority: both online and offline retailers can benefit from our strong brand-building and co-marketing programs. Retailers now distributing F-Secure solutions include Mediamarkt, Saturn, Amazon, Musta Pörssi, Anttila, Ebuyer, Fry's Electronics and Tiger Direct.

Case study: BASF banishes the threat

The client

BASF, headquartered in Ludwigshafen, Germany, is one of the world's leading chemicals companies, with 90,000 employees working for 164 subsidiaries in 38 countries. A highly available IT infrastructure is indispensable to the smooth running of all its production and business processes.

The challenge

To protect the global BASF IT infrastructure from attacks by computer viruses.

The solution

All new PCs are pre-configured with F-Secure® Anti-Virus™, protecting against more than 140,000 viruses and their variations, plus worms and Trojans. F-Secure® Policy

Manager™ enables central monitoring and managing of clients company-wide by one system administrator. And F-Secure® Radar™ keeps system administrators aware of virus and DDoS attacks via mobile phones, PDAs or pagers.

Results

Thanks to F-Secure's scalable, future-proof solutions, viruses, worms and Trojans are no longer regarded as a serious danger to the BASF IT infrastructure.

"We now have much-improved control over this threat. At the same time, the intelligent multi-stage alarm system, as well as flexible and central manageability considerably decreases our work load." – Peter Freund, BASF IT Services.

Case study: Cogeco Cable Inc. cares for its customers

The client

Cogeco Cable Inc. is Canada's fourth-largest cable operator, serving nearly 1.5 million households with video and audio services, high-speed Internet access and digital telephony.

The challenge

To provide safe surfing, downloading and e-mail to a non-expert home user base and enhance the customer online experience. Simplicity of installation, ease of use and high reliability were all considered essential.

The solution

Cogeco partnered with F-Secure to offer a comprehensive suite of security services to its customers, including antivirus,

firewall, antispam, parental control, internet dialler control and automatic update features.

Results

Adoption rates for the Cogeco security suite have been excellent. The company also appreciates F-Secure's ability to integrate with its OSS, its professional project management and the unique co-branding and customization of the solution.

"Our high-speed Internet service continues to grow sharply due to an offering which includes high-performance F-Secure security products" – Louis Audet, President & CEO, Cogeco Cable Inc.

And the winner is... you!

Naturally we are proud of our achievements in IT security and honored that F-Secure solutions are recognized by the leading industry media.

But our deepest satisfaction is in providing reliable protection for you and all who depend on computers, networks and mobile phones in their business and personal lives.

Recent business security awards

Virus Bulletin

Over the years 1998-2005 several F-Secure products, including F-Secure Anti-Virus Client Security, F-Secure Anti-Virus and F-Secure Anti-Virus for Workstations and File Servers, have passed the prestigious "VB 100%" test.

West Coast Labs

F-Secure Anti-Virus Client Security and F-Secure Anti-Virus have passed the Checkmark tests performed by West Coast Labs. Successful products must detect and disinfect all viruses in the wild. F-Secure Anti-Virus Client Security passed both on-demand and on-access.

InfoWorld

InfoWorld magazine September 2005 reviewed 10 anti-spyware products, three of which had integrated antivirus and firewall with anti-spyware. F-Secure Anti-Virus Client Security received the highest score and was ranked "excellent".

PC Magazine

F-Secure Anti-Virus Client Security and F-Secure Policy Manager received five stars out of five in the Italian PC Magazine's November 2005 review.

Netverk og Kommunikasjon – Best i Test

F-Secure Internet Gatekeeper was the best gateway product in Netverk og Kommunikasjon magazine's January 2005 issue.
"This means that F-Secure knows what it is doing."

Recent home computing security awards

PC Pro

F-Secure Internet Security 2005 won Internet Security Group Test in the March 2005 edition of PC Pro.
"No frills but plenty of protection and zero tolerance for hassle make F-Secure hard to resist."

Computer Buyer

F-Secure Anti-Virus 2005 received the Computer Buyer Top 50 award, December 2004.
"It looks good, it detected every virus and customized Trojan we had and it's easy to use."

Recent mobile phone security awards

ProtectStar

ProtectStar Mobile Security Award 2005.

"F-Secure is a pioneer in security applications optimized for mobile appliances, providing reliable protection against viruses and other potential hazards."

About F-Secure Corporation

F-Secure Corporation protects consumers and businesses against computer viruses and other threats from the Internet and mobile networks. We want to be the most reliable provider of security services in the market. One way to demonstrate this is the speed of our response. According to independent studies in 2004 and 2005 our response time to new threats is significantly faster than our major competitors. Our award-winning solutions are available for workstations, gateways, servers and mobile phones. They include antivirus and desktop fire-wall with intrusion prevention, antispam and antispymware solutions, as well as network control solutions for Internet Service Providers. Founded in 1988, F-Secure has been

listed on the Helsinki Exchanges since 1999, and has been consistently growing faster than all its publicly-listed competitors. F-Secure headquarters are in Helsinki, Finland, and we have regional offices around the world. F-Secure protection is also available as a service through major ISPs, such as France Telecom, TeliaSonera, PCCW and Charter Communications. F-Secure is the global market leader in mobile phone protection provided through mobile operators, such as T-Mobile and Swisscom and mobile handset manufacturers such as Nokia. The latest real-time virus threat scenario news are available at the F-Secure Data Security Lab weblog at <http://www.f-secure.com/weblog/>
